**Innovative Computing Systems and SentinelOne Bring Next-Generation
Cybersecurity to Law Firms**
SentinelOne to Host Innovative at its Booth During RSA Conference 2016

LOS ANGELES – February 17, 2016 – Law firms’ productivity and intellectual property depend on the security of their digital environments, and maintaining that security hangs on proactive maintenance and patch management, a properly configured firewall and endpoint protection.

Innovative Computing Systems and SentinelOne have partnered to provide enhanced cybersecurity to law firms using SentinelOne’s unique Endpoint Protection Platform (EPP).

SentinelOne EPP dynamically tracks each newly created process to identify malicious patterns in real time. No matter the attack method, once malicious behaviors are detected, whether on disk or in memory, SentinelOne immediately locates the attack and mitigates and contains it to eliminate the threat. It integrates prevention, detection, mitigation, remediation and forensics for desktops, laptops, tablets, smartphones, VDI, servers and embedded systems. SentinelOne supports major platforms, including Windows, OS X, Linux and Android.

“SentinelOne is transforming information security,” says Michael Kemps, CEO of Innovative Computing Systems. “We are very pleased to be partnering with such innovators. Aside from winning awards, SentinelOne has created a solution that provides defense-in-depth by replacing current antivirus software.”

Innovative Computing Systems will join SentinelOne at this year’s RSA Conference, which is dedicated to helping drive the information security agenda worldwide with annual industry events in the United States, Europe and Asia.

“We are very appreciative of SentinelOne’s inviting us to join them at this important conference. This only highlights our belief that the legal community needs as much security as it can get and we can provide it. SentinelOne brings the newest technology to bear on persistent, ever-growing and dangerous cyberattacks. We are confident our clients will see immediate benefits upon implementing SentinelOne’s EPP solutions. We look forward to bringing EPP to our clients and the legal community in general,” says Kemps.

About Innovative Computing Systems, Inc.

Innovative Computing Systems, Inc., has focused exclusively on the technology needs of law firms since 1989. Innovative Computing Systems takes a best-of-breed approach to all of its offerings. Innovative Computing Systems selects only premier technology partners to provide solutions to its clients and is committed to maintaining long-term strategic relationships with clients to ensure the highest levels of success with IT initiatives.
