Mimecast Email Security with Targeted Threat Protection for Legal Professionals

Your life and your business are in your email. Just consider the amount of intellectual property and other confidential information sitting in your inbox. True cybersecurity requires a defense-in-depth strategy with multiple layers of security solutions protecting your firm. Innovative Computing Systems recommends implementing Mimecast's Targeted Threat Protection as one of those layers.

Mimecast's 100% cloud-based **Advanced Email Security with Targeted Threat Protection** uses multiple sophisticated detection engines and a diverse set of threat intelligence sources to protect your firm's email from spam, malware, phishing and targeted attacks.

Mimecast Targeted Threat Protection includes:

Mimecast Secure Messaging
A user-friendly, secure channel for sending and receiving sensitive information via email.

Enterprise Information Archiving
A single, secure and accessible cloud archive for your business' most important information.

Large File Send
Overcome message and attachment size limits to easily send large files securely.

Attachment Protect
Multi-layered malicious attachment protection, including conversion to a safe format, static file analysis, and sandboxing.

URL Protect
Real-time, on-click, website scanning protects against currently bad websites, or delayed exploits

Impersonation Protect
Instant and comprehensive protection from the latest malware-less social engineering-based email attacks, often called CEO fraud, impersonation, whaling or business email compromise.

Microsoft and Office 365
Security layer that works with or independent of Office 365 for defense in depth.

Advanced Threat Security S1
Cloud email security services that help to protect your organization from advanced email threats like spear-phishing and impersonation.

Protect your firm's email and information today. Contact an Innovative Computing Systems Account Executive at 1-800-541-0540 or sales@innovativecomp.com.
